

Concentric Baal Circles on the Continental Grid

by Jeremy James

The US and Canada are covered by a network of obelisks which we have called The Continental Obelisk Grid – see our earlier paper, *The Continental Obelisk Grid and the Babylonian Elite who Control the United States* (#149).

As we explained in that paper, the location of obelisks on the Grid is determined by the Masonic/Babylonian principle, *"point within a circle."* The "point" is the center, sometimes occupied by an obelisk, which represents the phallus of the Egyptian god, Osiris. The "circle" is the feminine aspect, which is penetrated by the masculine obelisk and represents the Egyptian goddess, Isis. The circle generally has two obelisks on its circumference, equidistant from the central obelisk.

The purpose of this paper is to illustrate how this principle has been applied across the continent of the United States. Many of the obelisks on the Grid are among the largest in the world. A few are simply gargantuan. The Washington Monument, for example, is 555ft tall, while the Jefferson Davis obelisk in Kentucky is 351ft. Compare this with Nelson's Column in Trafalgar Square, London, which is universally regarded as an exceptionally tall monument and yet it is 'only' 169ft. The Bennington Battle obelisk (306ft) in Vermont, the Bunker Hill obelisk (221ft) in Boston, and the High Point obelisk (220ft) in New Jersey are also considerably taller than Nelson's Column.

Obelisks are located according to a set pattern

The contiguous United States is akin to 48 countries linked together. So, given that it has only 90 or so obelisks of significant size, we would be greatly surprised if they happened, purely by chance, to be located in accordance with a pattern of any kind. In fact, it would be mathematically impossible for this to happen. Geographically speaking, an obelisk, no matter how large, is no more than a dot on the surface of a vast continent. If they were randomly distributed – as we are led to believe – the 90 or so 'dots' in our obelisk table would exhibit no discernible symmetry or pattern, such as the alignment of three or more obelisks or the existence of circles comprising two or three obelisks on the circumference and another at the center.

In paper #149 we showed that the Grid has been constructed in its entirety from an initial plan, with new obelisks being added over time in conformity with the plan. No part of the Grid has emerged by chance. Every obelisk over a certain size – larger than those normally used as memorials in cemeteries – must be assigned a location in accordance with the principle, "*point within a circle.*"

One of several 'point within a circle' images used in Freemasonry.

Edmond Ronayne

In order to appreciate the significance of this principle, it will help if we look briefly at a notable figure in the field of Christian discernment – the Irishman, Edmond Ronayne. He led a major public program to expose Freemasonry in America in the 1880s. His principal work was *The Master's Carpet*, which was published in Chicago in 1879 and reissued 1887. It had a very revealing subtitle: *Masonry and Baal-Worship Identical*. A former Roman Catholic, he joined the Keystone Lodge No. 639 in Chicago in 1870 and, by his own account, was unanimously elected Senior Warden the following year and Worshipful Master in December 1872. This gave him complete access to all Masonic material and firsthand familiarity with all its rituals and paraphernalia. His testimony therefore carries great weight.

By the grace of God his eyes were opened and he recognized that Freemasonry was nothing but the worship of Baal in a disguised form. To his credit he set out to expose this monstrous deception and went to great lengths to alert fellow Christians. In *The Mason's Carpet* he gave an exceptionally informative account of the thinly concealed paganism of Freemasonry and its close links to the occult religious beliefs of ancient Egypt. In doing so he left the reader in no doubt as to the wickedness of the Craft:

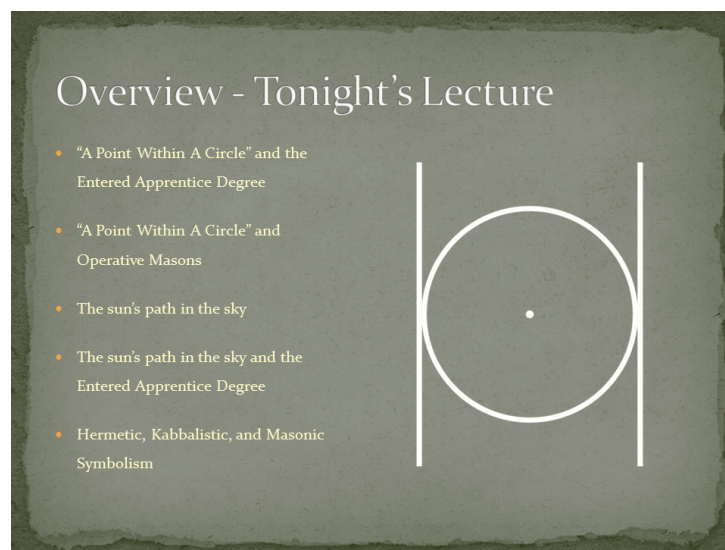

"The more we discuss the principles of Freemasonry, the closer we examine its hidden works of darkness and investigate the numerous symbols and ceremonies which it uses in the "dark chambers of its imagery" (Ezekiel viii. 12), in illustrating its religious philosophy, the more we are overwhelmed with astonishment at the immensity of its wickedness and at the wonderful ingenuity manifested in the construction of its entire system of idolatry." (p.316)

Ronayne provides a clear description of the Masonic principle, "point within a circle," and reveals its obscene and depraved character. The following extracts show how the point in this pagan symbol represents the sun-god Osiris in the form of a phallus penetrating the vagina of the goddess Isis:

"The Point within a Circle" is not only a pagan symbol, referring to the sun-god of Masonic worship from first to last, and borrowed directly from the "ancient initiations" of the old Baal mythology, but it is in fact as near a true representation of that lascivious idol – the Baal-peor of Moab – as common decency will permit the Grand High Priests of Masonry to represent it in books intended for general circulation. (p.319)

...Osiris, the chief deity or sun-god of Egypt, is said to have been treacherously slain by his brother Typhon, his body cut into fourteen different parts and buried or concealed in as many different places. Isis, or nature – the wife of Osiris – in her search for the mutilated body of her husband, is supposed to have found all the parts but one – the organ of generation. For this she made a "factitious representation," which the Masonic textbooks assure us, was in the shape of a "sculptured column, made of wood, and surrounded by a circle at its base, representing the *cteis* or female generative organ," and this she set up in the temple of Isis, that divine honor might be paid to it.

This monstrous abomination...was the Phallus of the old pagan worship, and which we are positively assured is now represented in every Masonic lodge throughout the world, under the figure of "The Point within a Circle." Being supposed to be a part of Baal or the sun-god, it was sometimes also called Baal-peor, and was always and everywhere worshiped with licentious worship. This was the chief deity of the Moabites, as we read in the twenty-fifth chapter of Numbers, and it was because the men of Israel joined themselves to this abominable idol and took part in its wicked worship, indulging in the most flagrant licentiousness in honor of it, that twenty-four thousand of them were slain. (pps. 327-328)

Overhead used in a Masonic lecture.

Masonic authorities confirmed what Ronayne was saying

In our previous paper, *Consecrated Ground and the Gettysburg Triangle* (#150), we gave a number of quotations from leading Masonic authorities which confirmed all that Ronayne was saying.

While very knowledgeable on the inner workings of Freemasonry, Ronayne was probably unaware of the Babylonian obelisk grid that spans the United States and Canada. The existence of this continental shrine to Baal is probably made known only to members of the 30th degree and higher, and even then to selected individuals only.

In this paper we will give several examples of the way the Continental Obelisk Grid embodies numerous representations of the "point within a circle" principle. Through these secret configurations – hidden in plain view – the Grid pays homage to the sun-god Osiris and his evil consort, Isis. It also celebrates the union of the male and female sexual organs and the androgyny (or gender-fusion) which Babylonians esteem.

Center	Macdonough obelisk, Plattsburgh, NY	44.41.56.60 N 73.27.04.54 W
First 'satellite'	Fort Griswold obelisk, Groton, CT	41.21.17.94 N 72.04.45.91 W
Second 'satellite'	High Point obelisk, High Point, NJ	41.19.15.50 N 74.39.41.85 W

As we discuss these esoteric circles, please bear in mind that the obelisks in question are, in many cases, among the largest in the world. We are not talking about obscure inexpensive ornaments scattered here and there across the landscape, but massive manmade objects installed in designated locations at considerable cost. Our research suggests that the total number in this select category – super-sized obelisks – is around 90 or so, many of which are cited in the course of this paper.

The 'Mile Wide' Rings

We begin, in our first example (see chart and table on previous page), with three such obelisks.

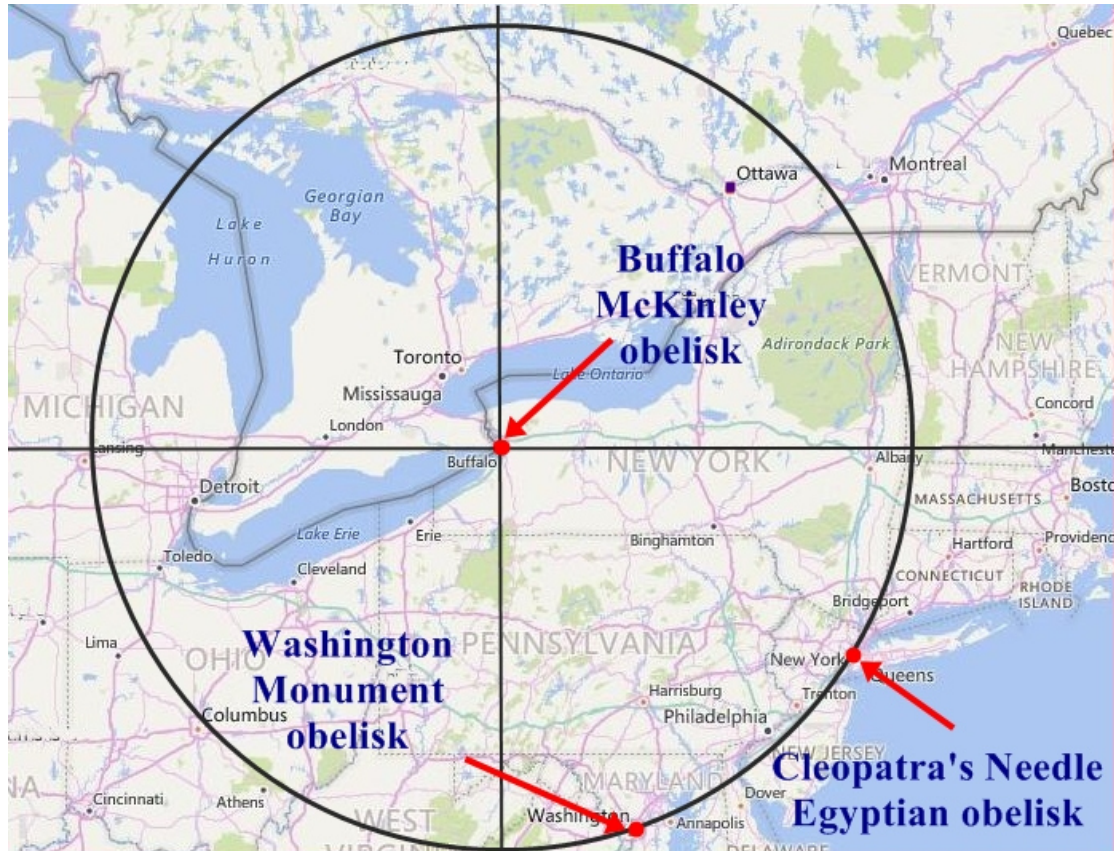

The distance from Macdonough to High Point (obelisk to obelisk) is exactly 241.11 miles, while the corresponding distance to Fort Griswold is exactly 241.06 miles. Our analysis indicates that, with regard to virtually all of the circles on the Grid, the 'ring' of the circle [the width of the perimeter line] can be up to a mile wide. It would seem at first that this small leeway was designed to accommodate the continental scale of the entire enterprise. However the same 'mile wide ring' also appears in the UK Obelisk Grid. In this instance, using Google Earth measurements, the Fort Griswold obelisk is only 250ft nearer the Macdonough obelisk than the one at High Point.

Three of the largest obelisks in the world are in an almost perfectly geometrical formation, even though they are over 240 miles apart. This could only happen by design.

		
Macdonough 135ft tall	High Point 220ft tall	Fort Griswold 135ft tall

Our next example [see chart and table overleaf] features the tallest obelisk in the world, the Washington Monument in DC, and one of the few original Egyptian obelisks that still survive, Cleopatra's Needle in Central Park, NYC. The third is the massive McKinley Monument in Buffalo, NY.

Cleopatra's Needle and the Washington Monument are 292.23 miles and 292.19 miles, respectively, from the obelisk at Buffalo – a difference of only 240ft.

Center	McKinley obelisk	42.53.11.12 N 78.52.41.34 W
First 'satellite'	Cleopatra's Needle	40.46.46.68 N 73.57.55.41 W
Second 'satellite'	Washington Monument	38.53.22.10 N 77.02.06.84 W

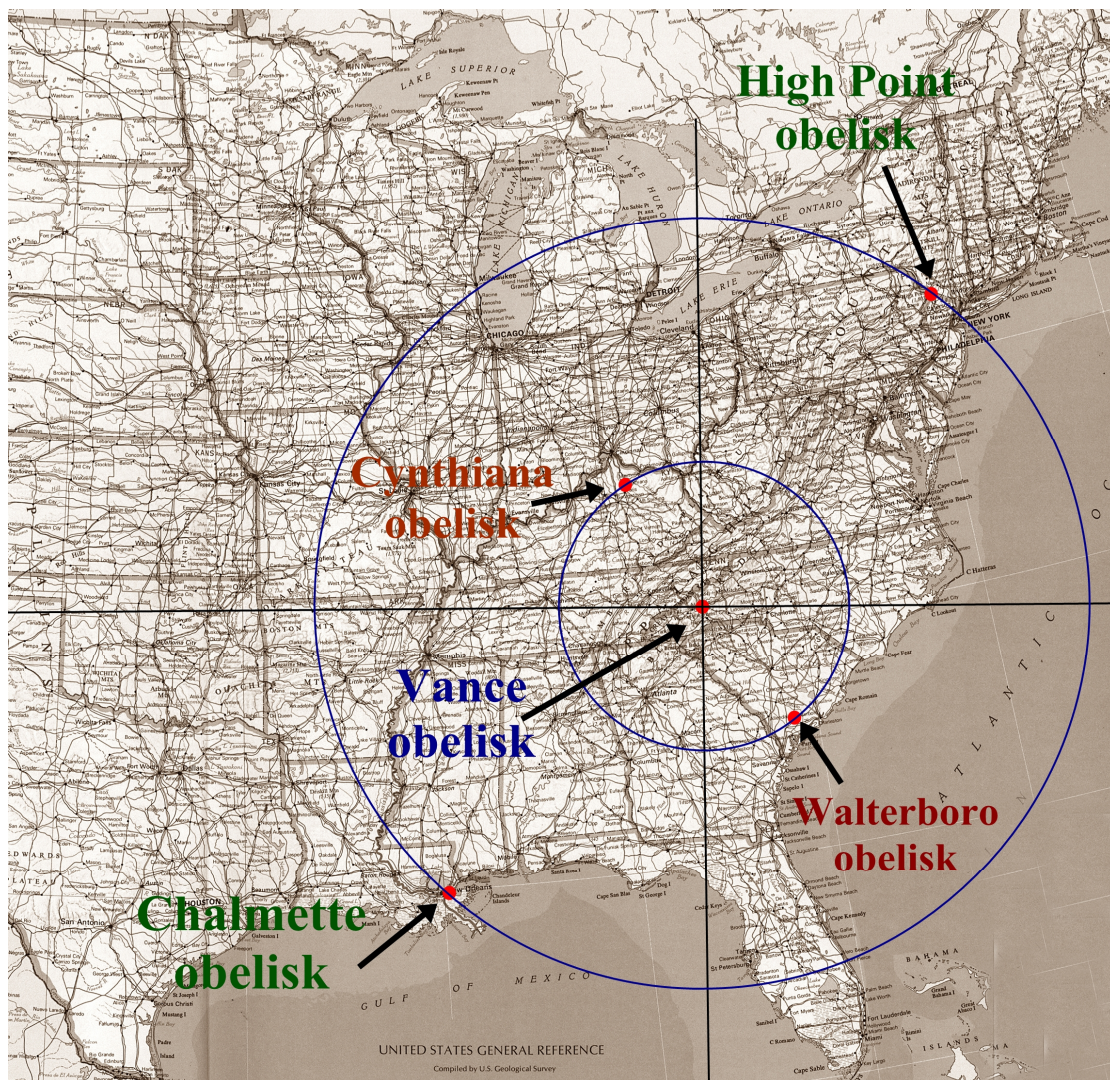

Again we find an almost perfect circle covering a huge geographical area and comprising three of the largest and most prestigious obelisks in N America.

		
McKinley Obelisk 96ft tall	Washington Monument 555ft tall	Cleopatra's Needle 69ft tall

So far we have considered only examples comprising one circle, but there are many examples of central obelisks with two or more concentric circles. One of these is the imposing Vance Obelisk in Asheville, N Carolina [See table and chart below].

Center	Vance Obelisk, Asheville	35.35.42.30 N 82.33.05.30 W
Inner Circle		
First 'satellite'	Confederate Obelisk, Walterboro, SC	32.54.08.24 N 80.40.00.22 W
Second 'satellite'	Confederate Obelisk, Cynthiana, TN	38.23.09.86 N 84.16.51.03 W
Outer Circle		
First 'satellite'	High Point obelisk, High Point, NJ	41.19.15.50 N 74.39.41.85 W
Second 'satellite'	Chalmette Monument, Chalmette, LA	29.56.32.82 N 89.59.38.90 W

Here we have two near perfect circles with a common center occupied by an obelisk that is 65ft tall. The outer one actually covers most of the eastern United States.

	
Walterboro Obelisk 25ft tall	Cynthiana Obelisk 22ft tall
	
Vance Obelisk c.65ft tall	
	
High Point 220ft tall	Chalmette Monument 100ft tall

Patterns with Four or More Concentric Circles

Our next example has, not two, but four concentric circles. The center of all four is the very strangely located Roosevelt obelisk in a high pass in Montana – elevation 5200ft. The eight obelisks in its four concentric circles include Cleopatra's Needle in NYC and the massive commemorative obelisk in Wyoming, Pennsylvania.

Baal Circles with Three Obelisks

The following examples take our analysis to the next level, where the circles comprise, not two obelisks, but three. Many such circles exist, which is further evidence of just how carefully the Continental Grid has been constructed. It is of immense importance to the Babylonian Elite who control the United States, who have worshipped Baal for generations, and who are determined to replace what is left of Biblical Christianity with the paganism and idolatry of Baal.

There are those who say Christianity has no real enemies! This is simply insane. Biblical Christianity has a multitude of enemies, plus a powerful supernatural field-marshal conducting the entire campaign. His greatest servants on earth are the Babylonian Elite who control the wealth of the world and who have built the Continental Obelisk Grid, as well as similar grids in Europe and elsewhere.

The High Place of High Places

We now progress to a Babylonian pattern which ought to unsettle even the most hardened sceptics. It is based around an obelisk on High Point, New Jersey, which has an elevation of 1,800ft:

This monstrosity stands an incredible 220ft tall. It was built in 1930 as a 'war memorial' – out in the middle of nowhere. Its special place in the Continental Grid is demonstrated, not only by its massive size and its elevated location, but by the existence of at least five Baal circles around it, each consisting of three obelisks. It is conceivable that High Point has even more circles of this kind, but these are the ones we have managed to identify.

Raleigh c.40ft tall	Detroit [A] c.12-15ft tall	Detroit [B] c.12-15ft tall

Jefferson Davis Monument, Kentucky – 351ft

No survey of the high places of America could omit the second tallest obelisk in the world – the Jefferson Davis monument in Kentucky, which towers 351ft into the sky. This is a shrine to Baal (not a memorial to Jefferson Davis), and has at least twelve concentric Baal circles dancing around it.

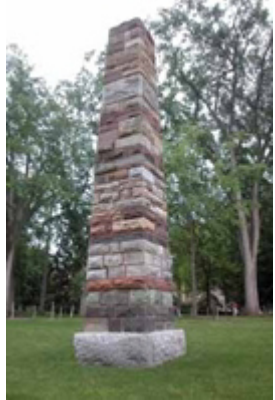

What are the odds of something like this happening by chance? Given that we are talking mainly of the US east of the Rockies and of state-owned obelisks of significant stature, we can estimate the odds by dividing the entire territory into concentric channels, each a mile wide, with the Jefferson Davis obelisk at the center. This would give us a minimum of 500 such channels. Assuming at least 100 obelisks 'qualify' for a place, then the odds of any one channel having two obelisks – purely by chance – is 1 in 5. By the same token, the odds of two channels, each having two obelisks, is 1 in 25 ($1/5 \times 5$). Thus, the odds of ten such channels arising, purely by chance, is 5×10 or 1 in 9.7 million. Since we are talking about 12 concentric circles, not ten, the odds are 1 in 244 million.

The 12 Baal circles around the Jefferson Davis obelisk in Kentucky.

The Olympic Logo

We are all familiar with the Olympic logo, which comprises 5 intersecting colored rings, but what does it mean?

Official logo of the Olympics

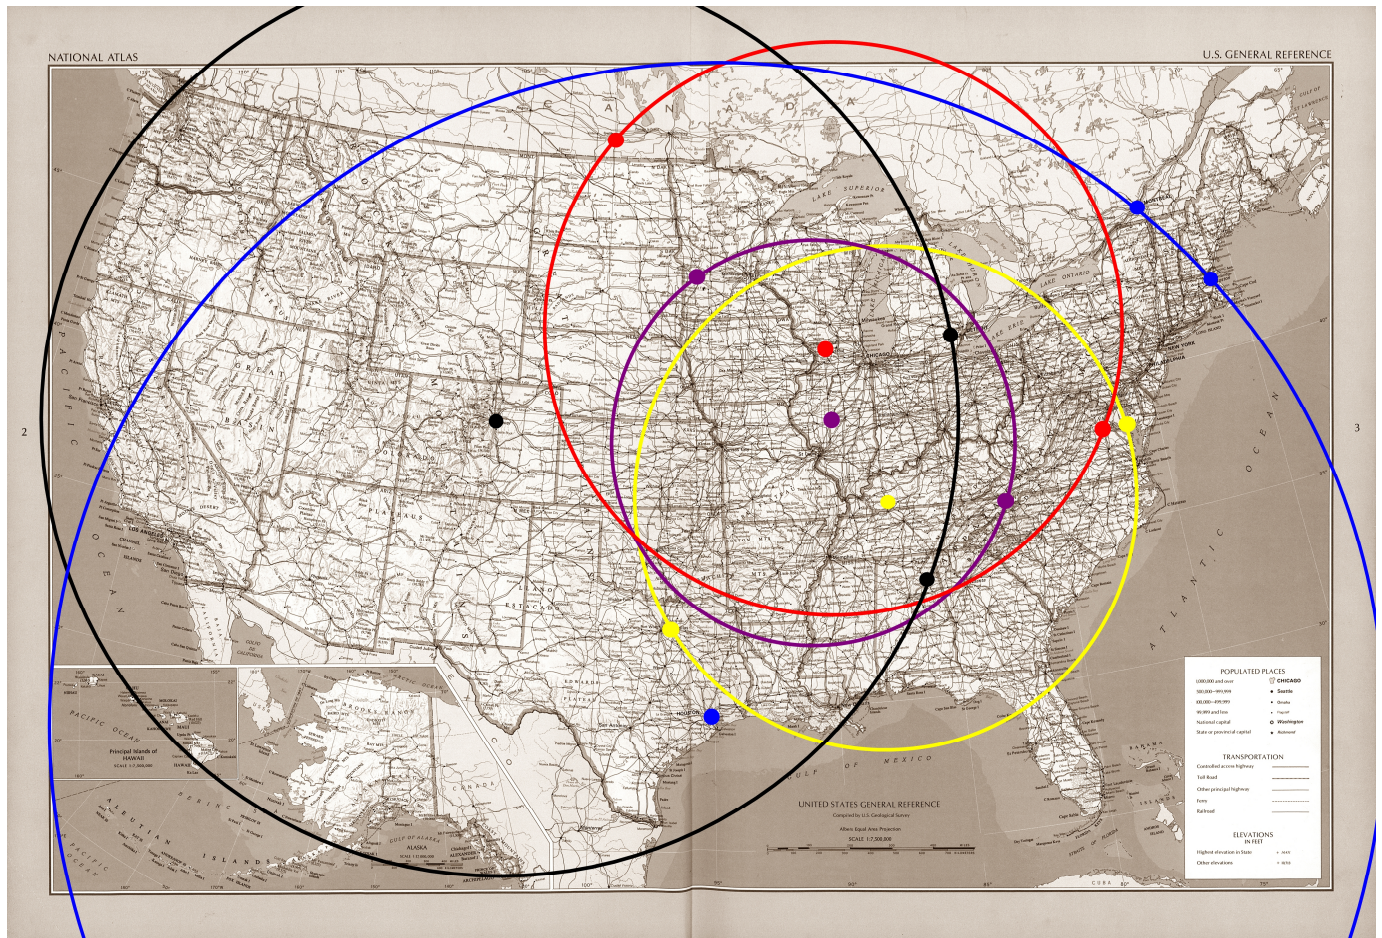

The Olympics are part of the Illuminati program to unify the nations and bring about a One World Government. They are even named after Mount Olympus in Greece, fabled home of the 'gods' or fallen angels. The Olympic torch, which receives a great deal of coverage on television every four years, is carried over long distances by selected athletes and celebrities, signifying the god, Prometheus, who stole fire from heaven and brought it to mankind. As such it symbolizes the so-called 'Light-Giver', Lucifer, whom the Illuminati worship as the one true god.

[See chart overleaf] Read chart clockwise from 12.00.

Consider the following chart, which shows a number of randomly selected Baal circles across the United States. The obelisks in question are massive – see the table on the previous page. By displaying each circle in a different color we can discern the origin of the Olympic logo.

As intended by the Illuminati, the Olympic logo represents the huge network of Baal circles that cover the earth.

CONCLUSION

The world is controlled with great cunning from behind the scenes by a co-ordinated group of men who hate the LORD God of Israel. Their god is Baal or Osiris or Lucifer. In return for great wealth and political power, they serve this supernatural being and help him achieve his long-cherished goal of installing his 'son' as 'christ' on earth.

As we have explained in previous papers, the construction of Baal circles is an important part of their religion. Through this means they worship and venerate the fallen angels. They would also appear to regard these circles as a source or conduit of supernatural power. This means they have an incentive to build more and more of them. As we advance further into the darkness of the End Time – before Christ Jesus returns to destroy the Satanic world system – we will see obelisks appearing with greater frequency in our towns and cities. They will be installed in novel and innovative ways, as works of art or symbols of peace, unity, and progress. We are already seeing this. The cost will be covered, not by public subscription or federal funding, as in the past, but by private donors, tax-exempt foundations, and big corporations.

The Satanic world system will boast and exalt itself into the End time, but the pride of the mighty will be brought low when Christ returns:

**"For the Lord GOD of hosts shall make a consumption, even determined, in the midst of all the land...Behold, the Lord, the LORD of hosts, shall lop the bough with terror: and the high ones of stature shall be hewn down, and the haughty shall be humbled."
– Isaiah 10:10 and 33**

Remember, it is coming, the great day of the LORD, **"the day of the great slaughter, when the towers fall."** Christ Jesus will do His Father's will, and the Children of Wickedness will scarcely be able to believe what they see.
